How to install the LU English web app

Use the email address you already use for lessons. The web app opens the same account, lessons, and homework, and installation is free. You can also keep joining from your browser.

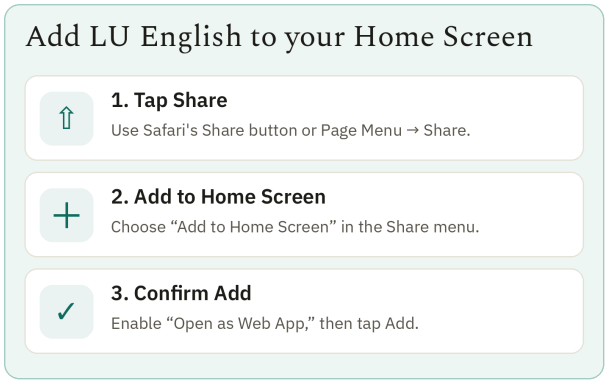

Start on the device you use for class

On your Dashboard, select **Get the App Now**, or open the LU English installation page directly. Look for **Get the LU English App**. The page changes to match the device you're using.

Choose the steps for your iPhone or iPad, Android, Mac with Safari, or computer with Chrome or Edge.

On an iPhone or iPad

1. Open the LU English installation page in **Safari**. Tap **Share** (the square with an up arrow). On an iPhone with a compact toolbar, open the page menu first, then tap **Share**.
2. Scroll through the actions and choose **Add to Home Screen**. On an iPad, open **More** or **View More** if the action is hidden. On an iPhone, if it's missing, scroll to **Edit Actions** and add it.
3. Turn on **Open as Web App** if shown, then tap **Add**. Go to your Home Screen and tap the new **LU English** icon.

These instructions appear on the LU English page. The Share button you need is in Safari.

On an Android phone or tablet

1. Open the LU English installation page in **Chrome**. Tap **Install LU English**. If your browser offers to install the app, tap **Install**.
2. If the LU English page shows menu instructions instead, tap the three dots in Chrome. Choose **Install and create shortcut**, then **Install**. Some versions show **Install app** directly.
3. Open **LU English** from your apps or Home Screen.

Install on a computer and open your lessons

On a Mac using Safari

1. Open the LU English installation page in **Safari** on macOS Sonoma or later. Choose **File** in the menu at the top of your Mac, then **Add to Dock**. You can also find **Add to Dock** under Safari's Share button.
2. Check that the name says **LU English**, then click **Add**. Click the new icon in your Dock.

On a computer using Chrome or Edge

Open the LU English installation page and click **Install LU English**. Confirm the browser's installation prompt. If menu instructions appear instead, follow the steps for your browser.

Chrome: Open the three-dot menu. Choose **Cast, save, and share**, then **Install page as app**. Confirm the installation.

Microsoft Edge: Open the three-dot menu. Choose **More tools**, then **Apps**, then **Install this site as an app**. Choose **Install**.

Open your lessons from the icon

Open **LU English**. If you see **You're using the LU English App**, choose **Open LU English**. If a sign-in page appears, use your usual lesson email, select **Email me a code**, and enter the six digits sent to your inbox.

On your dashboard, find **Upcoming lessons** to enter your class. Choose **Homework** to open an assignment. If you also take classes on another device, repeat the installation steps on that device.

Common questions

Where can I find the install button again?

Choose Get the App Now on your dashboard. On an iPhone or iPad, start in Safari and use Share.

Do I need to install it before my next lesson?

You can join right away in your browser. Your dashboard contains the same bookings and homework.

Where can I see the browser's own instructions?

Open Apple's iPhone guide, Apple's iPad guide, Safari on Mac, Chrome Help, or Microsoft Edge Support.
